DETAILED ACTION

Page 2

This application is the national stage entry of PCT/FI03/00796, filed 24 Oct 2003; and claims benefit of foreign priority document FINLAND 20021904, filed 25 Oct 2002.

Claims 1-21 are pending in the current application.

Restriction Requirement

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, drawn to a process for manufacturing a transglycosylation product of a starch derivative.

Group II, claim(s) 19 and 20, drawn to a transglycosylation product of a starch derivative.

Group III, claim(s) 21, drawn to a method of using a transglycosylation product of a starch derivative as a starting material for polymers. (See Examiner's Note)

Examiner's Note:

Claim 21 recites non-statutory "use" claims. See MPEP 2173.05(q). Examiner has interpreted claim 21 as being drawn to a method of using a transglycosylation product of a starch derivative.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common feature of the inventions of Groups I-III are the transglycosylation products of a starch derivative. However, the transglycosylation products of a starch derivative is a known product. See Carr, Journal of Applied Polymer Science, 1991, 42, p45-53, provided by Applicant as reference CA on IDS filed 22 Apr 2005, page 45, left column, lines 1-4. Therefore the transglycosylation products of a starch derivative is not the special

technical feature of a single general inventive concept. The special technical feature of the invention of Group I is the specific method of manufacturing a transglycosylation product of a starch derivative of a specific chemical composition. The special technical feature of the invention of Group II is the specific chemical composition of the transglycosylation product of a starch derivative. The special technical feature of the invention of Group III is the specific method of use of a transglycosylation product of a starch derivative of a specific chemical composition.

Page 3

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise

Page 4

Art Unit: 1614

require all the limitations of the allowable product claim will be considered for rejoinder.

<u>All</u> claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan S. Lau whose telephone number is (571)270-

Application/Control Number: 10/532,398 Page 5

3531. The examiner can normally be reached on Monday - Thursday, 9 am - 4 pm

EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Ardin Marschel can be reached on 571-272-0718. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
